## PROFESSIONAL SUMMARY

- Azure Administrator with 7+ years of experience in Cloud Infrastructure Administration, Azure Operations, Security, Vulnerability Remediation,
- Currently working at Cognizant for the Electrolux project since April 2024, handling Azure administration, Akamai support, vulnerability remediation, and infrastructure operations.
- Hands-on experience in Azure Virtual Machines, Storage Accounts, Backup & Recovery, Azure AD, Monitoring, Load Balancers, and troubleshooting production issues.
- Experienced in vulnerability remediation, patching coordination, SSL certificate management, IIS administration, Akamai operations, and enterprise production support environments.
- Responsible for developing, maintaining, and monitoring the resources hosted on Azure.

## TECHNICAL SKILLS

|                                      |                                                                        |
|--------------------------------------|------------------------------------------------------------------------|
| <b>Infrastructure Technologies :</b> | IIS, Akamai                                                            |
| <b>Cloud Technologies :</b>          | Azure                                                                  |
| <b>Monitoring Tools :</b>            | Azure Monitoring & SCOM                                                |
| <b>Ticketing Tools :</b>             | Service-Now                                                            |
| <b>CI/CD Tools :</b>                 | Octopus, TeamCity                                                      |
| <b>Operating Systems :</b>           | Windows server 2008, 2012, 2012R2, 2016<br>Linux Basic Administration, |
| <b>Database :</b>                    | SSMS, Mongo DB (Application Based)                                     |
| <b>Languages :</b>                   | PowerShell Basics, Bash Basics                                         |
| <b>Web &amp; IIS :</b>               | IIS Administration, SSL Certificate Binding                            |

## CERTIFICATIONS

- Microsoft Certified Azure Fundamentals (AZ-900)
- Microsoft Certified Azure Administrator Associate (AZ-104)
- Microsoft Certified Azure Data Fundamentals (DP-900)

## Leadership

- Took **Ownership of Vulnerability** and closed >1500 vulnerabilities for windows servers in 2 Years for Electrolux project in Cognizant.
- Performed vulnerability assessments using Qualys scanner and Microsoft Defender for Cloud, identifying and prioritizing critical CVEs across servers and applications.
- Reduced critical vulnerabilities by 40% across 100+ servers within one quarter through proactive patching and .NET runtime upgrades.
- Remediated third-party vulnerabilities in Chrome, Notepad++, WinSCP, 7-Zip, and Adobe Reader, securing enterprise endpoints against high-risk CVEs.
- Prepared PPT reports and explained monthly vulnerability status to stakeholders, including newly identified issues, number of fixes completed, and ongoing remediation progress.

## PROFESSIONAL EXPERIENCE

### Cognizant – Azure Administrator | Electrolux Project

*April 2024 – Present*

- Managing Azure cloud infrastructure and supporting production environments.
- Creating and managing Azure Virtual Machines, Resource Groups, and Storage Accounts.
- Configuring and maintaining Network Security Groups (NSG) and access rules.
- Troubleshooting Azure VM issues including boot failures, connectivity issues, and performance-related incidents.
- Performing VM resize, disk expansion, and storage-related activities based on business requirements.
- Working on Azure backup configuration, restoration activities, and backup policy management.
- Managing Azure Active Directory users, access permissions, and role assignments.
- Monitoring Azure resources using Azure Monitor and SCOM
- Handling vulnerability remediation activities and coordinating security fixes within SLA timelines.
- Supporting Akamai-related operational activities and CDN configurations.
- Performing Akamai cache purge activities for applications and websites.
- Creating and modifying Akamai property rules based on customer requirements.
- Promoting Akamai property configurations from staging to production environments.
- Managing Akamai user access and onboarding activities.
- Creating URL redirects from source to destination domains as per business requirements.
- Working on Akamai Edge DNS configurations and DNS-related support activities.
- Experience in Azure Application Gateway configuration including listeners, backend pools, backend settings, and routing rules.
- Handling SSL certificate renewal activities including certificate requests, importing/exporting certificates, and SSL binding to backend servers, App Services, and Application Gateways.
- Experience in IIS administration including adding bindings, updating SSL certificates for hostnames, and monitoring website status.
- Gathering IIS website health reports including running and stopped site status.

- Proficiently performed database cloning from SSMS and Azure Portal, managing exports, imports, addition to elastic pools, and DTU resizing.
- Supported Azure apps by creating multiple Function Apps and Web Apps, managing infrastructure end-to-end.
- Implemented monitoring solutions with Application Insights to track performance and configured alerts for proactive issue detection across apps, ensuring reliability and operational efficiency.
- Troubleshooting DB performance at elastic pool in Azure.
- Worked on creating Azure alerts / monitoring
- Managing incident, change, and problem management activities using ticketing tools.
- Working in 24/7 operational support environments and handling critical production incidents.

## PREVIOUS EXPERIENCE

### **LTIMindtree – Sr. Software Engineer | NFUM(Insurance) Project** *July 2021 – April 2024*

- Administered Azure cloud infrastructure including Virtual Machines, Resource Groups, and Storage Accounts.
- Managed the complete lifecycle of Azure Virtual Machines, including provisioning, resizing, and troubleshooting.
- Implemented and maintained Network Security Groups (NSGs) and configured inbound security rules.
- Managed Azure resource migration across subscriptions.
- Created and maintained backup policies for Azure Virtual Machines and Azure SQL databases.
- Monitored Azure resources to ensure infrastructure availability and performance.
- Managed Azure AD users and role-based access requirements.
- Configured Auto Start/Stop schedules to optimize Azure resource utilization.
- Managed Azure Storage services and resolved storage-related incidents.
- Worked with Azure Load Balancer and Application Gateway to support application availability.
- Supported production incidents by troubleshooting VM, networking, and storage-related issues

### **HCLTech – Infra Cloud Engineer** *September 2020 – July 2021*

- Managed Azure Virtual Machines, Resource Groups, and Storage Accounts.
- Configured and maintained Network Security Groups (NSGs) to secure Azure resources.
- Resized Azure Virtual Machines based on business requirements.
- Troubleshot Azure VM issues including boot, connectivity, start, and stop failures.
- Added and managed data disks for Azure Virtual Machines.
- Supported Azure Backup by creating backup policies and enabling backups for Virtual Machines and databases.
- Monitored Azure resources using Azure OMS.
- Assisted in migrating Azure resources between subscriptions.
- Managed Azure AD user accounts and access permissions.
- Configured Auto Start/Stop schedules for Azure Virtual Machines.
- Worked with Azure Storage and resolved storage-related issues.

### **Atlas Systems – Trainee Software Engineer** *January 2019 – September 2020*

- Assisted in managing Azure Virtual Machines through the Azure Portal.
- Supported the creation of Resource Groups and Storage Accounts based on project requirements.
- Performed VM snapshot creation and restoration during maintenance activities.
- Assisted in securing Azure resources using Network Security Groups (NSGs).
- Supported Azure SQL Database backup and restoration activities.
- Assisted in creating and managing Azure AD user accounts.
- Created and queried Azure SQL Databases using SQL Server Management Studio (SSMS).
- Monitored SQL Server backup jobs and reported failures for resolution.
- Assisted in installing SQL Server updates and service packs under senior team guidance.
- Performed basic database health checks and supported database refresh activities.
- Worked with the team in resolving SQL Server and Azure infrastructure support tickets.
- Followed standard operating procedures (SOPs) while providing production support.

### **EDUCATION**

- B.Tech in Electronics & Communication Engineering – Vignana Bharathi Institute of Technology
- MBA in Finance – Sharada PG Institute of Research and Technological Sciences
